Smart Terminal

Product Name	Smart Terminal
Model	RD-WIFI
Product Overview	It is a wireless WIFI convertor, based on this terminal, user can cooperate with RUIDA motion controller to establish the wireless control LAN based on WIFI, and to get rid of the wired networking connection absolutely, which can reduce the user cost and increase flexibility.
Application Area	RuiDa smart wireless terminal is based on WIFI technology mainly used multiple machines networking in large manufacturer for integrated control, reducing cost, making the machine layout unlimited.
Technical Parameters	1. Wireless communication range is 100m. 2. High-speed wireless communication, transmission rate is 150M.
Function	1. Build wireless WIFI access one-to-one 2. Multicomputer access based on wireless router
Accessories	Connecting cable
Smart Terminal Size	70mm*135mm*25mm
Cable Size	45mm*75mm*28mm
Power Supply	AC 220V
Environment	－20℃~70℃
Others
